

**KULIC ADVISORY**

Signal over Noise.

SERVICE BRIEF 03

# Transformation Diagnostics

Identify blockers, ownership gaps, process friction, governance gaps, and execution risks before the program becomes theater.

Executive download | built for boardroom diagnosis and Monday execution

**KULIC ADVISORY**

Signal over Noise.

# What this solves

Identify blockers, ownership gaps, process friction, governance gaps, and execution risks before the program becomes theater.

- **Separate visible program activity from the system reality underneath.**
- **Find the few bottlenecks that explain most execution drag.**
- **Make leadership alignment concrete through ownership and decision evidence.**
- **Create an executive diagnosis that can trigger action fast.**

## From activity to architecture.

The point is not more effort. The point is a system that makes the right work easier to own, decide, and execute.

# How we move from signal to execution

## PRACTICAL ADVISORY ROUTE

1

### Diagnose the real system

Separate symptoms from architecture. Identify where ownership, process, governance, data, or decision flow is breaking execution.

---

2

### Redesign the execution path

Define the few structures that must change so the organization can move without creating more noise.

---

3

### Turn clarity into a Monday move

Translate the insight into one practical next action, one owner, one decision route, and one measurable follow-up.

---

## OPEN ADVISORY HOURS

**Bring the real bottleneck. Leave with the next concrete move.**

# Use this before the next executive meeting

## BOARDROOM QUESTIONS

### OWNERSHIP

Who owns the outcome when the handoff becomes difficult?

### DECISION FLOW

Where do decisions wait, repeat, or disappear?

### EXECUTION

Which activity looks successful but does not change the system?

### IMPACT

What would prove that the behavior is different next Monday?

## Signal over Noise.

The Kulic method turns unclear transformation activity into visible ownership, decision speed, and measurable execution.
